DYONICS[◇]
ARTHROPAK[◇]
Customized Procedure Kit

Customized convenience.
One part number, one procedure-specific solution.

You create the box, we'll create the convenience.

Increase standardization and maximize operational efficiencies, Smith & Nephew DYONICS ARTHROPAK procedure kits have been designed to increase efficiency for both the surgeon and facility.

Once created, repeat ordering is easy with a single part number representing a specific arthroscopic procedure. Now surgeons and facilities can match upcoming caseloads with existing part numbers, reducing inventory and simplifying their ordering process.

Surgeon Benefits

- Customized selection of procedure-specific products in one box
- Encourages and simplifies “best practice” supply for each case
- Customization can include disposable devices, as well as implants
- All Smith & Nephew products from start to finish
- Available in both pre-assembled and completely customized configurations

Facility Benefits

- Single part number
- Streamlined ordering process
- Reduced Inventory
- One supplier

Greater Breath of Product Options now includes Implants

Create your own arthroscopic procedure kit from a full line of products, or choose from a variety of pre-defined solutions.

- Anchors
- Screws
- Blades and Burrs
- Fluid Management
- Leg Holders
- Saw Blades
- RF Resection
- Cruciate Accessories
- Personal Protection
- Suture Passing Products
- Shoulder Suspension
- Cannulas
- Electrodes
