Disassembly and cleaning instructions for trial cup handle
SAP No. 75023343

These disassembly and assembly instructions are designed to supplement the existing brochure – *Instructions for care, maintenance, cleaning and sterilization of Smith & Nephew orthopaedic devices* (US Lit No. 01004).

**Key**
1. Drill holes
2. Screw
3. Spiral spring
4. Plate with pegs

**Disassembly**
In accordance with the *Instructions for care, maintenance, cleaning and sterilization of Smith & Nephew orthopaedic devices* (US Lit No. 01004).

The following applies to the disassembly of this device prior to cleaning:
- Unscrew the screw (2) with the ball head screwdriver.
- Remove the spiral spring (3).
- Remove the plate with the pegs (4).

**Pre-cleaning**
In accordance with the *Instructions for care, maintenance, cleaning and sterilization of Smith & Nephew orthopaedic devices* (US Lit No. 01004).
- Manually pre-clean all drill holes, passages and threads.
Machine cleaning and disinfection

In accordance with the *Instructions for care, maintenance, cleaning and sterilization of Smith & Nephew orthopaedic devices* (US Lit No. 01004).

- Please take special care to ensure that any cavities can be properly rinsed.

Checking and testing

In accordance with the *Instructions for care, maintenance, cleaning and sterilization of Smith & Nephew orthopaedic devices* (US Lit No. 01004).

The following applies in addition to or in place of the instructions:

- Check the thread for signs of damage.

Assembly

The device should be reassembled post cleaning and prior to sterilization.

- Assembly is in the reverse to disassembly.
- The plate with pegs can only be removed in one way, whereby the pegs (4) have to be inserted into the drill holes (1).
- The screw (2) should be screwed in as far as to allow the thread to be aligned with the plate with pegs (4). The thread (2) should not protrude.
